1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1-6 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. It is unclear whether claim 1 falls into one of the enumerated categories of patentable subject matter. It is unclear whether it is related to a process or an apparatus. In the preamble, the applicant claims a system with different functions according to a method. It would appear that the applicant intends for the claims to be drawn to an apparatus instead of a method (especially in view of the dependent claims). If this is the case, the problem would be corrected if, for example, the applicant changed line 3 of claim 1 from "filter function according to a vestigial side band method" to ---filtering using vestigial side band function---. Further, since it is appropriate to use "means plus function" to describe the means, it would appear that the term function should be deleted in lines 2 (two occurrences), line 4, line 6 and line 8. It would appear that the claims, as written, are drawn to "function in view of means" with the term "function" in them.

3. Claim 7 is allowed.

4. Although there are more comments than discussed with the applicant's attorney, when writing it up, the examiner noticed other problems. The applicant can feel free to call the examiner if there are any questions.
